

Safety Glasses

Safety Glasses

Introduction

I am thrilled to announce the addition of non-prescription safety eyewear to the family of personal protective products offered by Protective Industrial Products. This enhances our position as a broad based supplier of goods to industrial distribution and reinforces our commitment to the channel.

We have taken on this project carefully and thoughtfully choosing products that offer:

- features to improve wearer comfort,
- styling that emulates some of the most fashionable consumer products in the market today, and
- economy that makes them very affordable for your customers

As you look through this catalog, you will find 13 different styles and more than 70 SKU's that can fill the needs of any type of industrial job where safety eyewear is used.

All of them are manufactured in an ISO certified factory and meet the requirements of ANSI Z87+. You can combine any of these products with your regular orders for PIP's other products making it easier to meet our requirements for prepaid freight and minimum order size.

We invite you to consider this exciting new product group and hope that you will contact your sales representative today to take a look at our new eyewear first hand

Sincerely,
Joe Milot
President
